

ORBITAL ESCAPE SYSTEM

" A psych-stoner-doom rock unfolding smooth, hypnotic and intense melodies, with an instrumental strength propelling the audience across picturesque environments...

Welcome to the trip ! "

/ BIO

The project started in 2018. We released 2 singles in 2021 and our first album in June 2023. We started playing live in 2022 and shared the stage with famous bands as Paralyzed (D), Mantra Machine (NI), Apex Ten (Be), Fire Down Below (Be), Frank Never Dies (It)...

Each live performance is supported by trippy video projections to ensure a complete extra-terrestrial experience.

Niko Khap is on drums. He lives full time in the music since 2006. He played in numerous bands like " Emptiness ", " Salival " (Tool cover band), " Vortaex "... He's also a drum coach..

Fred Genet is on the « bass-synth », a one-of a kind instrument that he crafted for the need of the band : an electric bass with a midi keyboard inserted in the neck ! He's also the booker behind " Drifting Sunn " focused on psych-stoner-space rock shows.

Olivier Vancap on guitar is the soloist of the band, the instrumental storyteller who will take you far away from earth with a very personal blend of stoner, doom, psychedelic and post-rock.

/ UP-COMING SHOWS
